

Memory Card Game Overview

So, imagine you're diving into a fun memory card game where you get to match cute little images. The game starts with a bunch of cards all face down, showing the same generic image, like a "banner." Your goal? Flip the cards and find pairs of matching images.

The game kicks off by shuffling a set of cards featuring delightful treats like cherries, candy, cookies, and more. Each card has a hidden image that you can reveal by clicking on it. When you click, the card flips over to show the tasty treat it represents.

Here's how it works:

1. **Create the Board:** When you start the game, it builds a grid of card images. Each card is initially showing the same "banner" image, so you don't know what's underneath. You can click on any card to flip it over.
2. **Flipping Cards:** When you click a card, it flips and shows its hidden image. If you click a second card, the game checks to see if the two images match. If they do, you get a little victory cheer, and those cards stay flipped. If not, they flip back after a short wait, giving you just enough time to see what you clicked.
3. **Keep Track:** The game keeps track of your selections. If you accidentally click the same card twice, it kindly reminds you that you already flipped that one.
4. **Winning the Game:** As you find matches, the game counts how many pairs you've successfully matched. Once you've matched all the pairs, it congratulates you with a fun message!

Overall, it's all about memory, a bit of luck, and having a good time. So, gather your friends or challenge yourself, and see how quickly you can clear the board! Happy flipping! 🎉
